PROJECTS

SOCIAL MED(08/2022 - 01/2023)

SOCIAL MED is a web application focused on safe photo storage using MEAN stack

- Developed a web application using MEAN stack technology
- Designed a highly secured application for photo storage, focusing on user privacy

Hotel Management System (02/2023-06/2023)

Traditionally, a hotel property management system was defined as a system that enabled a hotel or group of hotels to manage front-office capabilities, such as booking reservations, guest check-in/check out, room assignment, managing room rates, and billing. It is a technology that allows hotel operators and owners to streamline their administrative tasks while also increasing their booking.

This hotel management system project in PHP MySQL focuses mainly on dealing with customers regarding their booking s, hotel records, etc. also the system display all the available data such as room categories, reservations, total income, pending payments, complaints, employees, and the hotel 'statistics.

Technology used:
PHP
MYSQL
HTML
CSS
